SUMMARY

I am a computer science student looking for a software engineering internship. I have a strong foundation in full-stack development, database architecture, and software optimization. Right now, I'm looking for an engineering team where I can help build functional software, handle database tasks, and ship real code.

COMPUTER SKILLS

- **Programming Languages:** Java, PHP, JavaScript, SQL, C# (.NET), C++, Python
- **Software & Frameworks:** HTML5, CSS3, React.js, Next.js, Node.js, Express.js, Tailwind CSS
- **Platforms/Tools/Environments:** MySQL, PostgreSQL, macOS / Unix Development, Git, GitHub

EXPERIENCE AND TECHNICAL PROJECTS

Full-Stack Developer | UiTM STEP (PHP, MySQL, Tailwind CSS, Apache)

- Engineered and deployed a web-based freelance marketplace platform for students to securely showcase technical skills and collaborate on projects.
- Architected a custom PHP backend and MySQL database to manage secure user authentication workflows and high-performance data storage.
- Implemented a responsive frontend using Tailwind CSS to ensure seamless layout scaling across desktop and mobile viewports.

Full-Stack Developer | Mainichi (React.js, Node.js, Express.js, MySQL)

- Developed a mobile-first Japanese learning application utilizing smooth UI animations and interactive elements to optimize user engagement.
- Designed and coded a Spaced Repetition System (SRS) algorithm to dynamically track and maximize vocabulary retention pathways.
- Built a robust backend infrastructure using Node.js and Express.js to parse client requests and manage user progress tracking datasets.

Desktop Software Engineer | EcoRevive (Java, JavaFX, Maven)

- Programmed a JavaFX desktop application utilizing Maven dependency management to log, manage, and monitor electronic waste recycling streams.
- Designed a custom dark-themed GUI featuring live analytical charting frameworks and reactive input queue management modules.
- Implemented file I/O systems allowing users to seamlessly export active logging metrics into structured CSV formats.

EDUCATION

Universiti Teknologi MARA (UiTM)

2024-2026

Kuala Terengganu, Terengganu

Diploma in Computer Science

ADDITIONAL INFORMATION

- **Spoken Languages:** Malay (Native), English (Fluent), Japanese (Conversational)
